

INDEX to VOL. XC. (B)

- Abney (Sir W. de W.) Two Cases of Congenital Night-Blindness, 69.
Aggregation, investigations on state of (Schryver and Speer), 400.
Anaphylaxis, biological significance of (Dale), 556.
Anthocyanins and cyanidins, production of (Everest), 251.
Atmosphere, cooling and evaporative powers of (Hill and Hargood-Ash), 438.
- Bacillus tetani*, isolation and serological differentiation of (Tulloch), 145 ; distribution of serological types of, in wounds, after inoculation (Tulloch), 529.
Bacterial infection, new factor in mechanism of (Bullock and Cramer), 513.
Bactericidal properties conferred on blood (Browning and Gulbransen), 136.
Balls (W. L.) The Existence of Daily Growth-Rings in the Cell Wall of Cotton Hairs, 542.
Bazett (H. C.) Observations on Changes in the Blood Pressure and Blood Volume following Operations in Man, 415.
Bell (R.) Obituary notice of, xxvi.
Beri-beri, distribution of deficiency substance of, in wheat, rice, and maize grains (Chick and Hume), 44.
Blood, bactericidal properties conferred on (Browning and Gulbransen), 136.
Blood pressure and volume, changes following operations (Bazett), 415.
Bose (Sir J. C.) and Das (G.) Researches on Growth and Movement in Plants by means of the High Magnification Crescograph, 364.
Bottomley (W. B.) The Isolation from Peat of certain Nucleic Acid Derivatives, 39.
Browning (C. H.) and Gulbransen (R.) Bactericidal Properties conferred on the Blood by Intravenous Injections of Diamino-Acridine Sulphate, 136.
Browning (C. H.) and Russ (S.) The Germicidal Action of Ultra-violet Radiation, and its Correlation with Selective Absorption, 33, 107.
Bullock (W. E.) and Cramer (W.) On a New Factor in the Mechanism of Bacterial Infection, 513.
- Cannon (W. B.) Croonian Lecture—The Physiological Basis of Thirst, 283.
Chick (H.) and Hume (E. M.) The Distribution in Wheat, Rice, and Maize Grains of the Substance, the Deficiency of which in a Diet causes Polyneuritis in Birds and Beri-beri in Man, 44 ; — The Effect of Exposure to Temperatures at or above 100° C. upon the Substance (Vitamine) whose Deficiency in a Diet causes Polyneuritis in Birds and Beri-beri in Man, 60.
Coal, four visible ingredients in (Stopes), 470.
Colloidal silica solutions, nature of growths in (Onslow), 266.
Cotton hairs, growth-rings in cell wall of (Balls), 542.
Cramer (W.) See Bullock and Cramer.
Crescograph, researches on growth in plants by means of the (Bose and Das), 364.
Croonian Lecture (Hickson), 108 ; (Cannon), 283 ; (Dale), 556.
- Dale (H. H.) Croonian Lecture :—The Biological Significance of Anaphylaxis, 556.
Das (G.) See Bose and Das.
Dreyer (N. B.) and Sherrington (C. S.) Brevity, Frequency of Rhythm, and Amount of Reflex Nervous Discharge, as indicated by Reflex Contractions, 270.

- Echinoderm larvæ with two and with no water-vascular systems, artificial production of (MacBride), 323.
- Emotive physiological changes, measurement of (Waller), 214.
- Enzymes in decomposition of glucose and mannitol by *B. coli communis* (Grey), 75, 92.
- Everest (A. E.) The Production of Anthocyanins and Anthocyanidins.—Part III, 251.
- Farmer (J. B.) On the Quantitative Differences in the Water-Conductivity of the Wood in Trees and Shrubs. Part I.—The Evergreens, 218; Part II.—The Deciduous Plants, 232.
- Fibrillation in mammalian heart (MacWilliam), 302.
- Flocculation of colloids by salts containing organic ions (Schryver and Speer), 400.
- Geotropic stimulation and electrical conductivity (Small), 349.
- Glucose and mannitol, decomposition by *B. coli communis* (Grey), 75, 92.
- Greenwood (M.) On the Efficiency of Muscular Work, 199.
- Grey (E. C.) The Enzymes concerned in the Decomposition of Glucose and Mannitol by *B. coli communis*. Part II.—Experiments of Short Duration with an Emulsion of the Organisms, 75; Part III.—Various Phases in the Decomposition of Glucose by an Emulsion of the Organisms, 92.
- Growth and movement in Plants (Bose and Das), 364.
- Gulbransen (R.) See Browning and Gulbransen.
- Hargood-Ash (D.) See Hill and Hargood-Ash.
- Heart, mechanism and control of fibrillation in (MacWilliam), 302.
- Hickson (S. J.) Croonian Lecture: Evolution and Symmetry in the Order of the Seapens, 108.
- Hill (L.) and Hargood-Ash (D.) On the Cooling and Evaporative Powers of the Atmosphere, as determined by the Kata-thermometer, 438.
- Hull (E.) Obituary notice of, xxviii.
- Hume (E. M.) See Chick and Hume.
- Interference bands formed by rays at small angles (Mallock), 186.
- Kata-thermometer, cooling and evaporation determined by (Hill and Hargood-Ash), 438.
- Kidd (F.) See Stiles and Kidd.
- Light rays, action on, and photosynthesis of, organic compounds (Moore and Webster), 168.
- Lucas (K.) Obituary notice of, xxxi.
- MacBride (E. W.) The Artificial Production of Echinoderm Larvæ with Two Water-Vascular Systems, and also of Larvæ Devoid of a Water-Vascular System, 323.
- MacWilliam (J. A.) The Mechanism and Control of Fibrillation in the Mammalian Heart, 302.
- Mallock (A.) Growth of Trees, with a Note on Interference Bands formed by Rays at Small Angles, 186.
- Moore (B.) The Formation of Nitrites from Nitrates in Aqueous Solution by the Action of Sunlight, and the Assimilation of the Nitrites by Green Leaves in Sunlight, 158; ——— and Webster (T. A.) Action of Light Rays on Organic Compounds, and the Photo-synthesis of Organic from Inorganic Compounds in Presence of Inorganic Colloids, 168.

Mottram (J. C.) and Russ (S.) Observations and Experiments on the Susceptibility and Immunity of Rats towards Jensen's Rat Sarcoma, 1.
Muscular work, efficiency of (Greenwood), 199.

Night-blindness, cases of congenital (Abney), 69.

Nitrites from nitrates in aqueous solution, formation of, by action of sunlight, and assimilation by green leaves (Moore), 158.

Norman (A. M.) Obituary notice of, xlv.

Nucleic acid derivatives isolated from peat (Bottomley), 39.

Obituary Notices :—

Power, Sir W. H., i.

Reid, C., viii.

Oliver, D., xi.

Smith, Capt. G. W., xvi.

Solms-Laubach, H. Graf zu, xix.

Bell, R., xxvi.

Hull, E., xxviii.

Lucas, K., xxxi.

Plimmer, H. G., xliii.

Norman, A. M., xlv.

Oliver (D.) Obituary notice of, xi.

Onslow (H.) Note on the Nature of Growths in Colloidal Silica Solutions, 266.

Peat, isolation of nucleic acid derivatives from (Bottomley), 39.

Photo-synthesis of organic compounds in presence of inorganic colloids (Moore and Webster), 168.

Plant cells, position of equilibrium in intake of salts by (Stiles and Kidd), 448.

Plants, growth and movement in (Bose and Das), 364.

Plant tissue, rate of absorption of salts by (Stiles and Kidd), 487.

Plimmer (H. G.) Obituary notice of, xliii.

Polyneuritis in birds, distribution in grains of deficiency substance of (Chick and Hume), 44 ; — Effect of exposure to high temperatures upon the substance (Chick and Hume), 60.

Power (Sir W. H.) Obituary notice of, i.

Rat sarcoma, susceptibility and immunity of rats towards (Mottram and Russ), 1.

Reflex nervous discharge and reflex contraction (Dreyer and Sherrington), 270.

Reid (Clement) Obituary notice of, viii.

Russ (S.) See Mottram and Russ ; Browning and Russ.

Schryver (S. B.) and Speer (N. E.) Investigations dealing with the State of Aggregation. Part IV.—The Flocculation of Colloids by Salts containing Univalent Organic Ions, 400.

Scorbutic diet and teeth in guinea-pig (Zilva and Wells), 505.

Sea-pens, evolution and symmetry in the order of the (Hickson), 108.

Sherrington (C. S.) See Dreyer and Sherrington.

Small (J.) Changes of Electrical Conductivity under Geotropic Stimulation, 349.

Smith (Capt. G. W.) Obituary notice of, xvi.

Solms-Laubach (H. Graf zu) Obituary notice of, xix.

Speer (N. E.) See Schryver and Speer.

Stiles (W.) and Kidd (F.) The Influence of External Concentration on the Position of the Equilibrium attained in the Intake of Salts by Plant Cells, 448 ; — The Comparative Rate of Absorption of Various Salts by Plant Tissue, 487.

Stopes (M. C.) On the Four Visible Ingredients in Banded Bituminous Coal: Studies in the Composition of Coal, No. 1, 470.

- Teeth of guinea-pig, changes by scorbutic diet (Zilva and Wells), 505.
- Tetanus, mechanism of infection in, and immunity from (Tulloch), 529.
- Thirst, physiological basis of (Cannon), 283.
- Trees and Shrubs, water-conductivity of wood in (Farmer), 218, 232.
- Trees, growth of (Mallock), 186.
- Tulloch (W. J.) The Isolation and Serological Differentiation of *Bacillus tetani*, 145 ;
 — The Distribution of the Serological Types of *B. tetani* in Wounds of Men who
 received Prophylactic Inoculation, and a Study of the Mechanism of Infection in,
 and Immunity from, Tetanus, 529.
- Ultra-violet radiation, germicidal action of (Browning and Russ), 33, 107.
- Vitamines, distribution in grains, and effect of high temperatures on (Chick and Hume),
 44, 60.
- Waller (A. D.) The Galvanometric Measurement of "Emotive" Physiological
 Changes, 214.
- Webster (T. A.) See Moore and Webster.
- Wells (F. M.) See Zilva and Wells.
- Wood in trees and shrubs, difference in water-conductivity of (Farmer), 218, 232.
- Zilva (S. S.) and Wells (F. M.) Changes in the Teeth of the Guinea-Pig, produced by a
 Scorbutic Diet, 505.

END OF THE NINETIETH VOLUME (SERIES B).
